# Senior Class Officers

## **PRESIDENT — STEVE CORONA**

Announcing for WGVE, writing VFW democracy speeches, being a guest teen DJ on WLS, and attending IU radio/television workshops keep our president, Steve Corona, on the go. GO CUBS is a familiar saying of Steve's. Green, orange, and black are his favorite colors, and he wants a lime green Continental. Some frequently quoted lines of Steve's are: "Oh, man" or "Slap me five, baby." Next year Steve will attend IU where he will major in law and minor in radio/television. His pet peeve is teachers who constantly knock teens. Steve is very happy to announce that he now has two trees in his yard available for zotting. Only the one in the front yard is dying.

## **SECRETARY — PAULA KUROWSKI**

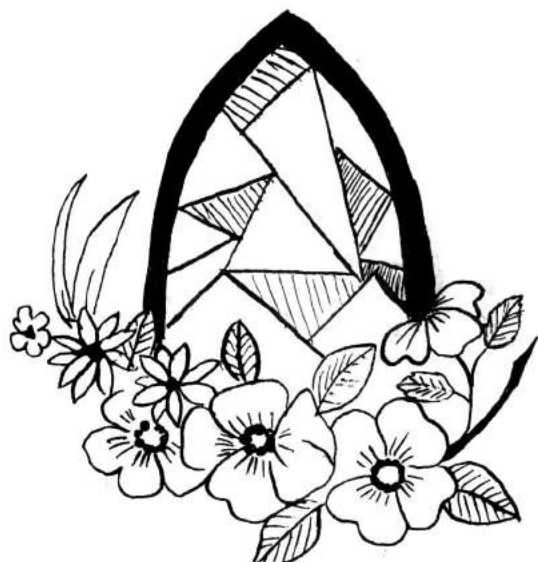

Our only girl officer stands almost 5'1", has brown hair and eyes and is named Paula Kurowski. During high school she has been a Student Council treasurer and representative, German Club Program Director, Junior Prom Committee Chairman, and GAA Secretary-Treasurer. A few of her likes are lasagne, the color baby blue, long walks, chemistry, volley ball, peach ice cream from Jack Spratt's and getting a sun tan. Paula can't tolerate beef stew or people who crack their knuckles. Next year she is attending I. U. Extension where she will take elementary teaching courses. Sometime in the near future, Paula wants to learn to swim. She doesn't like her name Penguin.

## **VICE PRESIDENT — JIM DAUGHERTY**

"Karate" Jim Daugherty has brilliant red hair, adoring blue hazel eyes and is 5'11" tall. During his high school years he played center on the football team. Jim has also participated in Latin Club, Junior Jury, and was one of the chairmans for the Junior Prom. A past-time of Jim's is karate — he is becoming quite an expert. Some things he likes are the color green, the song 'A Little Bit of Me,' spaghetti, and Mustangs. Next year he plans to attend the University of Michigan where he will study law. Jim also loves to ski; it's great fun.

## **TREASURER — LARRY SAMS**

Blue eyes brown, and 5'8", describe Larry "Yogi" Sams. During his high school years (sophomore and junior to be exact), Yogi participated in basketball. This bright young chap works at Miner-Dunn. When asked what his likes were he replied, "Terri, the color blue, the song 'Sunny,' the Rivierras, mini-skirts, and the word 'prettiest.' He doesn't dislike very many things; only people who can't make up their minds. Did you know that Yogi's desire is to go to Purdue to be a Double-E? Now surely everyone knows that that means an Electrical Engineer. A few words of wisdom were stated: "Watch for girls with brown eyes and good personalities." And his point of information was, "We graduate pretty soon."

## June 4, 1967

The Class of 1967 will proudly take one step closer to graduation day when 511 Seniors enter the main auditorium to "God of Our Fathers" by Roberts for Baccalaureate Service, June 4, at 3:00 p.m.

The service will begin with the invocation given by Reverend Michael Macchia of the Christian Assembly Church. Reverend Stanley Howell of Grace Methodist will then present the baccalaureate address. During the service the Concert Choir will sing "Lead Forth Thy Spirit" by Scheutsky and "The Lord Bless You and Keep You" by Simeone under the direction of Mr. Alfred Fissinger. Reverend James Fisko of Saint Mark's Church will present the benediction, and the service will conclude with the choir singing "Lead On O King Eternal."

## June 5, 1967

After an early morning rehearsal at 10:00 A.M., the Class of 1967 will meet for the last time on Monday, June 5, 1967, at 8:00 P.M. for the commencement exercises. To the well known tune of "Pomp and Circumstance," we will walk down the aisle of Memorial Auditorium.

Our Senior Class President, Steve Corona, will give the invocation that marks the beginning of the commencement exercises. Amy Pruitt and Pat McQuilkin, our valedictorian and salutatorian, will then present their speeches. As Mr. William Vorwald reads the names of the graduates, Dr. Montague Oliver will distribute the diplomas. With the memorable words, "The Class of 1967 is now graduated," and the turning of the tassels, 511 Seniors will leave the halls of Lew Wallace.

After Don Rosdil gives the benediction, the graduated Seniors will leave Memorial Auditorium to the fading strains of "Pomp and Chivalry."

## Amy

Amy Pruitt, valedictorian of the Class of 1967, has broken all records at our school by achieving an index of 4.388.

Amy has also participate in many extracurricular activities in the past four years. She was an active member of German Club, Klub Kem, G.A.A., and Olympians. She also served as treasurer of the Inter-City Council, president of Inkpots (last year she was vice president), president of the Senior Honor Society, and two-year president of the French Club. Amy also assisted the annual staff in writing copy for the 1967 Quill and Blade.

The valedictorian did advance study in the Joe Berg Program and was vice president of the World Affairs Forum. She attended the annual Girls' State Convention and visited France on Indiana University's honors program during the summer of 1964. Amy was also a finalist for the National Honor Society Scholarship and a semi-finalist in the National Merit Scholarship.

Amy has won numerous awards at the Activity Days. They include three math awards, two English awards, one award each for Biology, French, Chemistry, Latin, History, and Physics and was also awarded the NCTE award for excellence in English.

Amy's hobbies include swimming and snow-skiing. Her future plans are as of yet undecided, but we wish her luck and success in whatever she does.

## Pat

This year, the honor of being Salutatorian and ranking second in the class goes to Patricia McQuilkin. Pat graduates with an impressive index of 4.330.

To take away from the grind of her scholastic life Pat has participated in many clubs: F.T.A., G.A.A., Senior Honor Society, and Spanish Club. She serves as President of the Student Council, treasurer of Deutscher Verein (German Club) for two years, treasurer of Girls' Club and treasurer of French Club. She is also a member of the Inter-City Student Council.

Pat attended the IIT National Science Foundation Math Program and was an active participant of the Joe Berg Program. In 1966, Pat spent an exciting summer in Germany on Indiana University's honors program.

In her freshman year, Pat received awards for outstanding achievement in English, Math, German, and G.A.A. She received the Biology award her sophomore year and Student Council and F.T.A. awards her junior year. She was also a semi-finalist for the National Merit Scholarship.

Swimming and ice skating rank as two of Pat's favorite past-times.

The salutatorian plans to attend the University of Chicago, but she has not made any definite plans as to what her major will be. We wish her luck and success as she takes her place in the world.

## from Mr. Vorwald . .

The continuance of our way of life in this nation is predicted on the fact that our youth comes forward willingly to assume responsibilities. Today, youth "comes of age" to these responsibilities when he graduates from high school. You, the Lew Wallace Class of 1967, are now "of age." The type and degree of responsibility will vary with the individual and his sense of duty to his country and mankind.

As we face these new responsibilities, to whom shall we turn for assistance? What better assistance is there than the examples of the past. We venerate our forefathers for the heritage they have passed on to us. They faced problems which at the time seemed as insurmountable as today's. Yet, our nation not only survived but thrives. We in turn are the forefathers of tomorrow. In seeking moral support as we face our responsibilities let us not forget the cherished ideals of our founding fathers. Perhaps the true ideals of the founding of our nation were expressed by George Washington when he described the make-up of our flag. "We took the star from heaven, the red from our mother country, separating it by white stripes, thus showing that we have separated from her and the white stripes shall go down to posterity representing liberty." Much is implied from this description. It has the inference of ethereal origin, nourishment in old world cultures, and a bright future.

## from Mr. Smith . . .

Scientists tell us it is now possible to convert lead into gold. The cost for bringing about this change is approximately one million dollars per ounce. The question then is — is it worthwhile?

As you now begin your adult life you will constantly face the agonizing and never-ending question — is it worthwhile? Let us pause a moment and reflect on the past twelve years of your education and ask whether or not it was worthwhile.

This is a difficult question to come to grips with. Perhaps the ten marks of an educated man presented by Albert Wiggan over a quarter century ago would help us in this evaluation. He offered the following as marks of an educated man:

He keeps his mind open in every question until the evidence is complete. He always listens to the man who knows. He never laughs at new ideas. He cross-examines his day-dreams. He knows his strong points and capitalizes on them. He knows the value of good habits and how to form them. He knows when to call in the expert for advice. He trusts the Laws of God and lives by them. He lives the forward-looking, outward-looking life. And he cultivates a love for the beautiful.

We all realize that this has not been developed in each individual. Why? Certainly, there is no lack of opportunity for learning among us. Whitney Griswold explained this when he stated that what is lacking is a respect for learning, and an honest respect such as we now have for technical competence or business success. We honor learning, but do not believe in it. We spend as much time and energy on short cuts to learning and imitations of learning as we do on learning itself.

Astronaut John Glenn, Jr., stated that "A good many of us today are content to be fat, dumb, and happy. With a polyunsaturated diet of the coming 35-hour week, the fly-now-pay-later vacation, and fringe benefits, many of us live in a chromium-plated world where the major enemy we face is crab-grass."
